

The `picinpar` package*

Macros for making windows with \LaTeX

Incorporated are basic ideas of Alan Hoenig (Thanks Alan!) Thanks to Phil Taylor, who gave some useful hints during his tutorial at the EURO \TeX 92 in Prague.

Also thanks to Ulrik Vieth, who incorporated the macros for generating captions within the windows.

Known problems:

- Don't use `\samepage`
- Use `\footnotemark` within and `\footnotetext` outside the `window`-environment instead of `\footnote`
- When using the `epic`-package load `picinpar` before `epic` like

```
\documentstyle[... ,picinpar ,epic]{...}
```

*This manual corresponds to `picinpar.sty` v1.2a, dated July 13, 1993.

Changes:

- 1.1 If `\brokenpenalty\maxdimen` then it's set to 9999 within the window's group

Reported by `kuhlmav@elec.canterbury.ac.nz`

- 1.2 When centering a window and the right column contains less lines than the left column then the right lines are raised by using `\vfill`

Reported by Wolfgang Riedel, TU Chemnitz

- 1.2a A better way to shift the right box. There was some trouble when the window is on the left. I don't know why I didn't notice T_EX's `overfull \vbox`

Reported by Stephan Seidl, `seidl@rcs.urz.tu-dresden.de`
